BUREAU OF METEOROLOGY
Queensland Region
Flood Warning Centre

Media: The Standard Emergency Warning Signal should NOT be used with this warning.

FLOOD WARNING FOR THE CONNORS AND ISAAC RIVERS Issued at 3:50pm on Friday the 15th of February 2008 by the Bureau of Meteorology, Brisbane.

The main flood waters in the Isaac River are peaking near the major flood level in the Yatton area. Moderate flooding continues on the Connors River at Pink Lagoon.

Heavy rainfall across the headwaters of the Connors and Isaac Rivers and Funnel Creek during this morning is causing renewed rises and minor to moderate flooding.

Minor flooding continues on the Comet River at Rolleston and on the Dawson River at Newlands.

Moderate flooding is remaining steady on the Connors River at Pink Lagoon where at 2pm the river level was at 13.95 metres.

At 240pm, the Isaac River at Yatton was 16.51 metres and steady with moderate flooding. Moderate flooding downstream on the Mackenzie River at Tartrus continues to rise, where at 245pm the river level was at 14.60 metres.

Recent local rainfall is causing moderate flooding in the Fitzroy River at Yaamba, which will cause higher than normal tides at Rockhampton over the next few days.

The flood waters from the Connors and Isaac Rivers will cause stream rises in the Fitzroy River during next week, with a peak at Rockhampton expected late next week. Predictions for Rockhampton will be made when a peak is recorded at Tartrus.

The next warning will be issued around 10am Saturday.

Weather Forecast : [issued 0525 Friday]

Patchy rain. Fresh SE winds.

Latest River Heights in metres include : [* denotes automatic station]

| | | |
